Cover letter

September 2026

I have been living in Sweden for 4 years now, though I do not consider my Swedish to be at an acceptable level for working so I am only interested in roles where only English is sufficient. My work ethic is that I like to work fast and deliver solutions that are high quality without being over-designed in a team where everyone aspires to be the best they can. My ideal position is one where I can give my absolute all towards my craft while maintaining a healthy work/life balance. I have experience leading teams, so if there is a situation where the response is time sensitive and nobody else is stepping up I am willing to take charge. This should give a good idea of if I am a good cultural fit for your company.

I'm interested in on-prem roles in Stockholm primarily, both fixed-term contracts and permanent positions. I am also willing to relocate temporarily for fixed-term contracts assuming the employer is willing to cover the necessary costs and arrangements involved.

I am available ASAP. Outside of work I like to write fiction, attend various book clubs and play boardgames.
